

Bleumi Pay – Installation Guide For osCommerce

Accept quick and secure digital currency payments (like Tether USD, USD Coin, Stasis EURO, CryptoFranc) in your osCommerce Store with Bleumi Pay.

Installation Overview

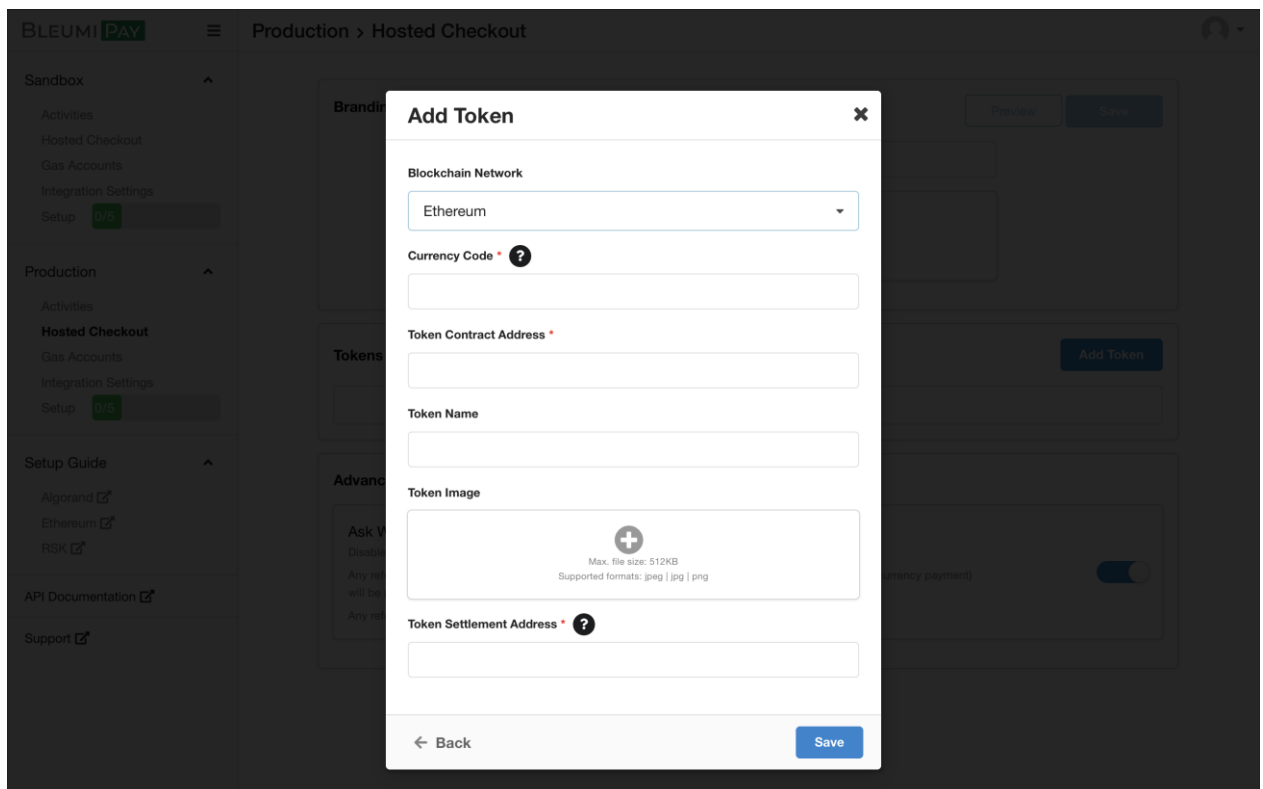

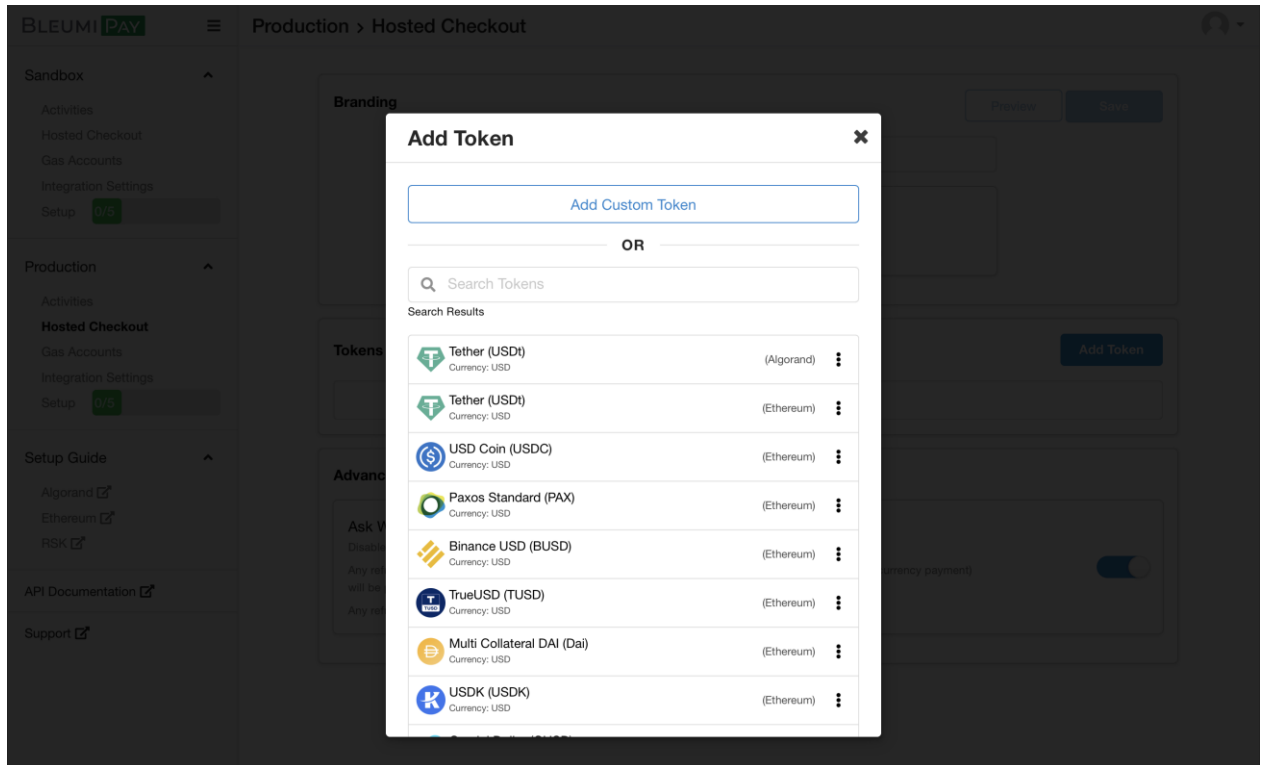

Step 1: Configure Your Bleumi Pay Account.....	2
Step 1.1: Setup Hosted Checkout	2
Step 1.2: Configure Gas Account	4
Step 1.3: Create API Key & Setup Webhook.....	5
Step 2: Install & Configure Bleumi Pay Extension In Your osCommerce Store	6
Appendix	8
Order Status.....	8
Custom Tables.....	9
Uninstall Bleumi Pay	11

Step 1: Configure Your Bleumi Pay Account

Step 1.1: Setup Hosted Checkout

- 1) Log in to [Bleumi Pay Dashboard](#) and navigate to **Sandbox (or) Production > Hosted Checkout**.
- 2) Under **Branding**, customize the Brand Name and Brand Logo to be displayed in the Bleumi Pay Hosted Checkout of your integration.
- 3) Under **Tokens**, click **Add Token** to configure the tokens that you wish to receive as payments from your integration. You can either:
 - a. **Add a custom token**
 - b. **Select a predefined token** and provide a Token Settlement Address (Your Wallet Address to receive payments).

The screenshot shows the Bleumi Pay dashboard interface. On the left is a sidebar with navigation links: Sandbox, Production, Setup Guide, API Documentation, and Support. The main content area is titled 'Production > Hosted Checkout'. It contains three sections: 'Branding' with 'Brand Name' and 'Brand Logo' fields, 'Tokens' with an 'Add Token' button, and 'Advanced Settings' with a toggle for 'Ask Wallet Address for Refund'. Red boxes highlight the 'Brand Name' field, the 'Brand Logo' upload area, and the 'Add Token' button.

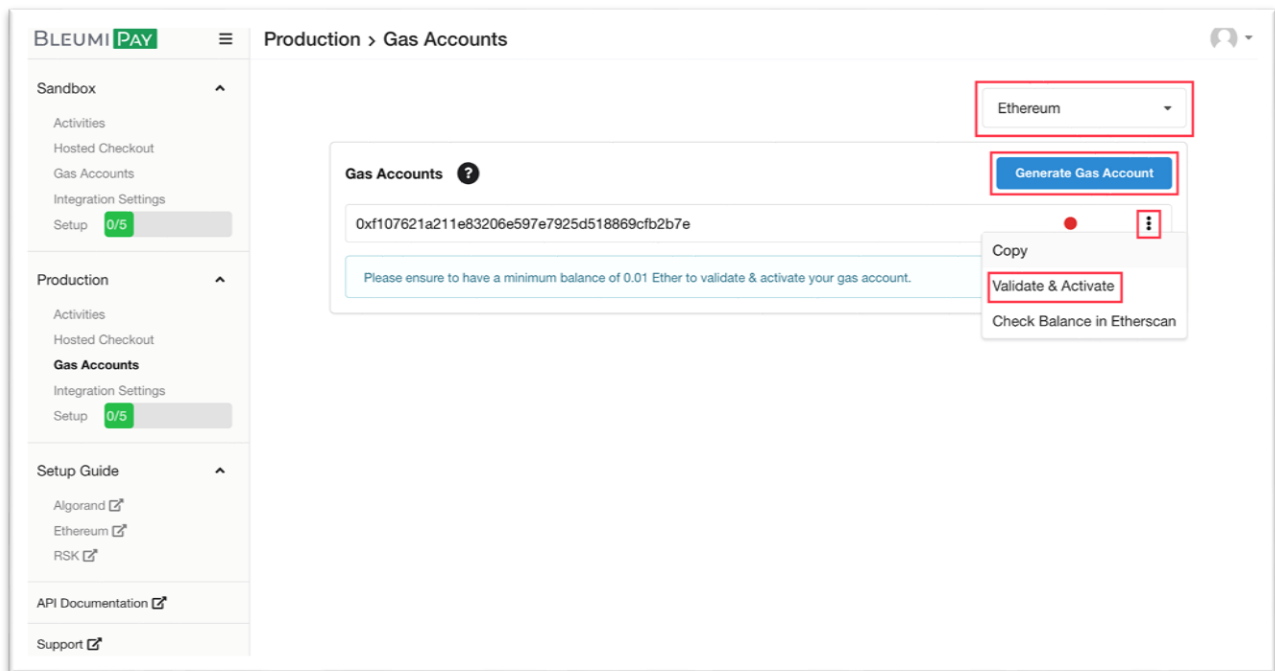

Add a custom token

Step 1.2: Configure Gas Account

Gas Accounts are used to fund Network Fee for your payment operations (Settle/Refund) on the Network.

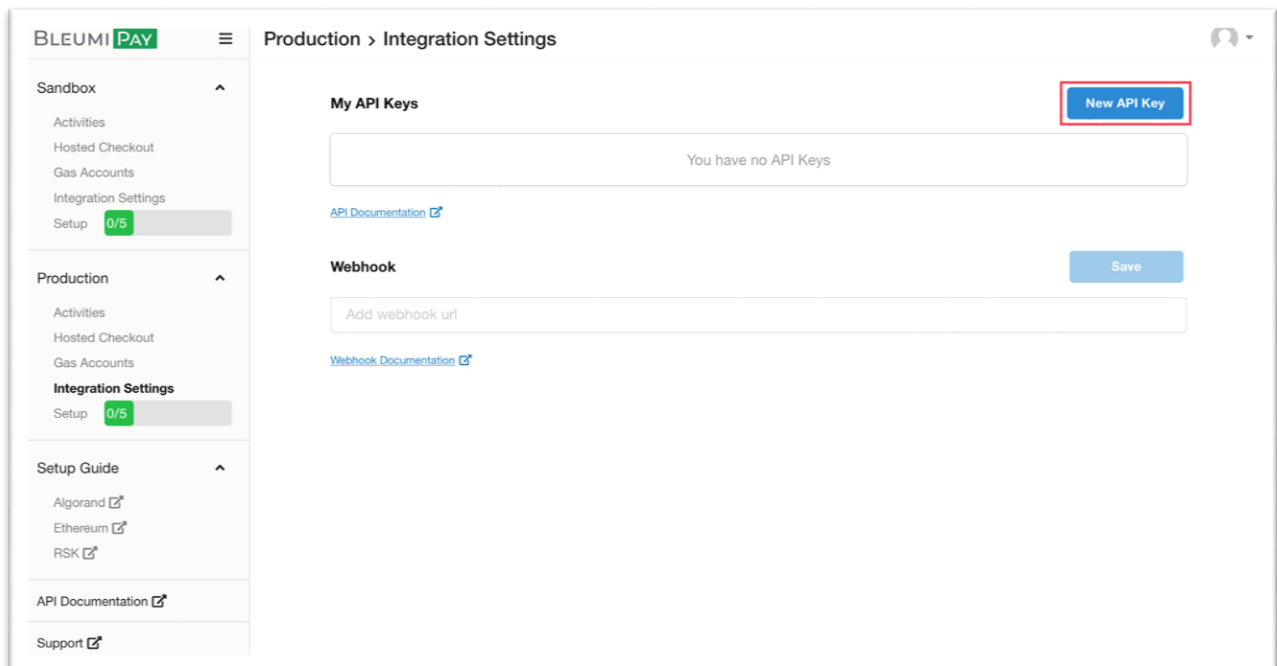

- 1) Log in to [Bleumi Pay Dashboard](#) and navigate to **Sandbox (or) Production > Gas Accounts**.
- 2) **Select the Network** for which the Gas Account needs to be setup.
- 3) Click **Generate Gas Account**.
- 4) **Fund Gas** to the Gas Account and click on **Validate & Activate** to activate the Gas Account.

Step 1.3: Create API Key & Setup Webhook

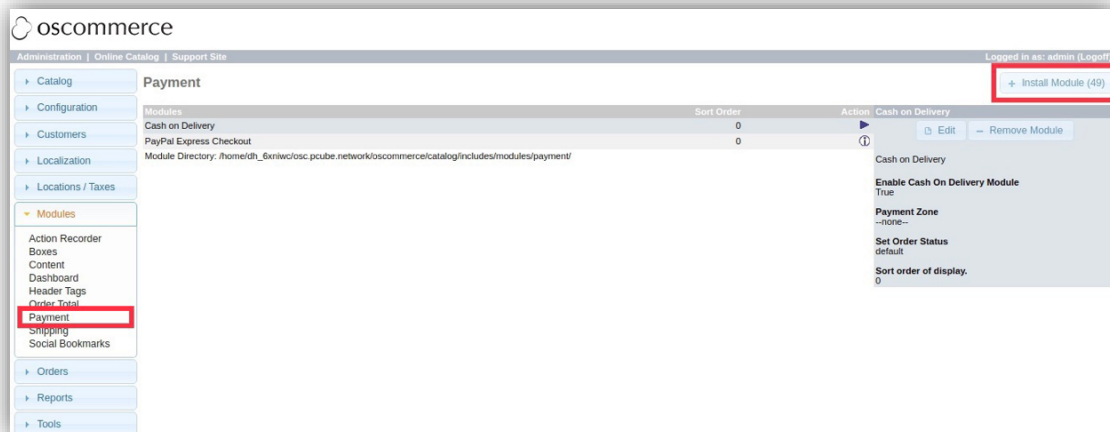

Log in to [Bleumi Pay Dashboard](#) and navigate to **Sandbox (or) Production > Integration Settings** and click **New API Key** to create an API Key.

Note: Production network access requires a verified account. To enable production access, contact support@bleumi.com.

Step 2: Install & Configure Bleumi Pay Extension In Your osCommerce Store

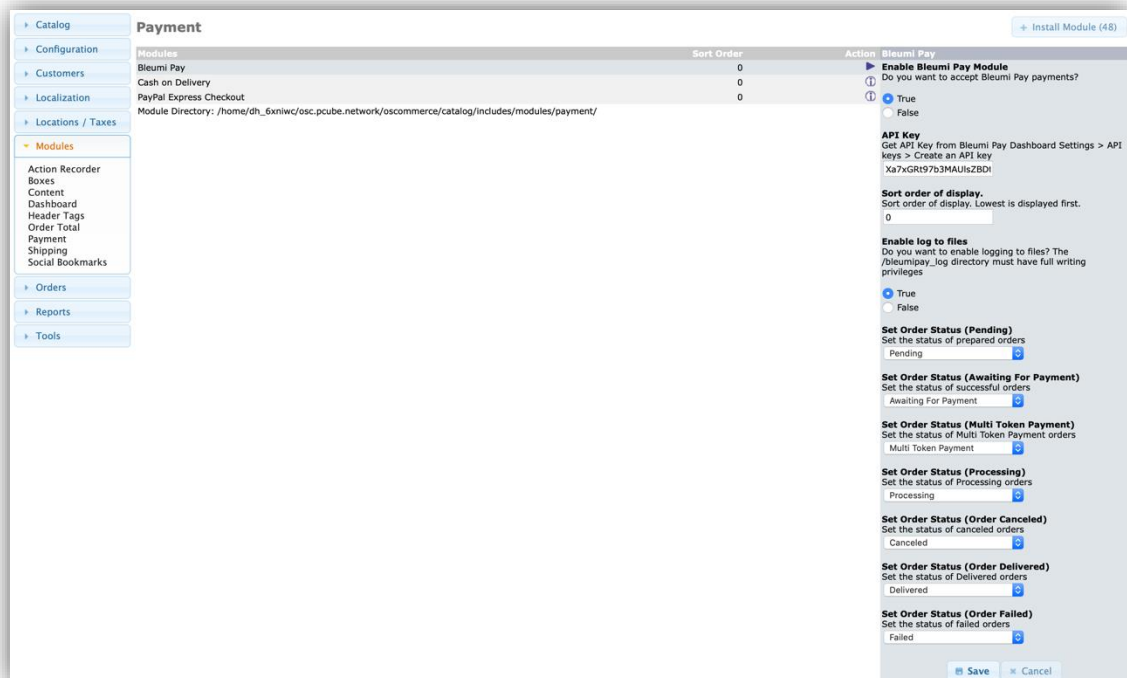

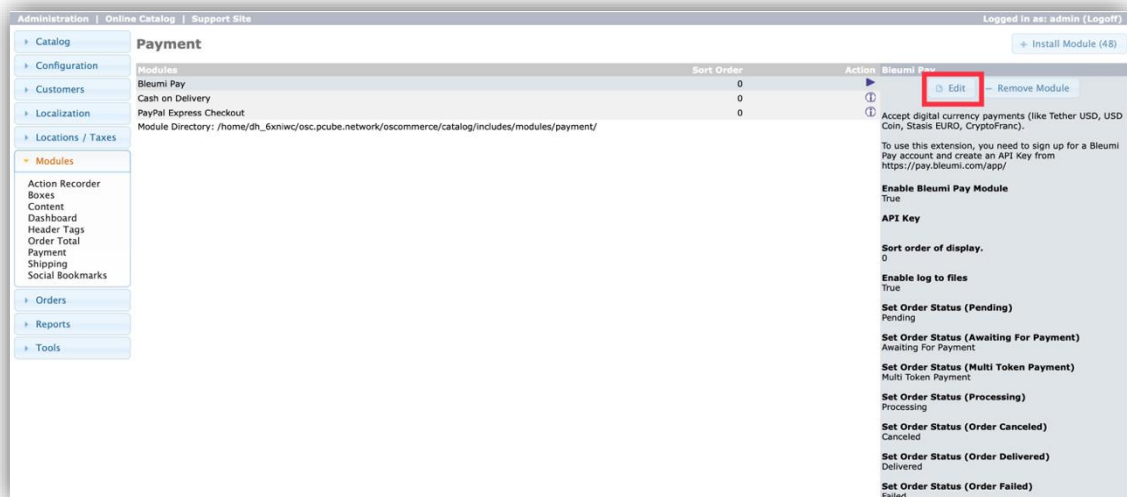

- 1) Download [Bleumi Pay - osCommerce Extension](#).
- 2) Run the following commands on the unzipped folder.
\$ composer install --ignore-platform-reqs -vvv
\$ bash deploy.sh -d <absolute path of the root folder of your osCommerce installation>
- 3) Log in to the admin panel of your osCommerce installation.
- 4) Navigate to **Modules > Payment** and click on **+ Install Module (n)**

- 5) Select **Bleumi Pay** from the available list and click on the **+ Install Module** button to add Bleumi Pay as a payment module to your osCommerce store.

- 6) Configure Bleumi Pay payment module:
 - a. Click **Edit** to configure the module.
 - b. Check **True** to enable the module.
 - c. Copy and paste your Bleumi Pay API Key from [Bleumi Pay Dashboard](#) > **Sandbox (or) Production > Integration Settings**.
 - d. Update Order Status against each order processing state.
 - e. Click **Save** to save changes.

- 7) This extension requires the following cron jobs to be configured and run at a frequency of every 3 hours.

S. No.	cron job	URL	Schedule (Execution hour)
1	Payments	STORE_URL/bleumipay_cron.php?id=payment	0,3,6,9,12,15,18,21 hour of the day
2	Order	STORE_URL/bleumipay_cron.php?id=order	1,4,7,10,13,16,19,22 hour of the day
3	Retry	STORE_URL/bleumipay_cron.php?id=retry	2,5,8,11,14,17,20,23 hour of the day

Where STORE_URL = <https://<domain-name>/<root-folder>/catalog/>

Appendix

Order Status

S. No.	Order Status	Notes
1	Pending	Order created. Awaiting payment.
2	Awaiting Payment Confirmation	Bleumi Pay Custom Status Payment received. Verifying payment.
3	Processing	Payment verified. Order is awaiting fulfillment.
4	Delivered	Order is fulfilled. Requires no further action.
5	Canceled	Bleumi Pay Custom Status Order canceled by the customer or the osCommerce store admin. Requires no further action.
6	Multi Token Payment	Bleumi Pay Custom Status Payment received in multiple tokens. How to resolve multiple token payments for an order? <ul style="list-style-type: none">- Log in to Bleumi Pay Dashboard.- Navigate to Sandbox (or) Production > Activities.- Find the payment using the Order Id.- Refund all but one token with sufficient balance – this ensures that Payments cron job changes the order status from “Multi Token Payment” to “Processing”.
7	Failed	Bleumi Pay Custom Status Order status changes to “Failed” if the expected payment amount for an order is not received within 24hours after that order was created. How to refund any partial payments received for an order? <ul style="list-style-type: none">- Log in to Bleumi Pay Dashboard.- Navigate to Sandbox (or) Production > Activities.- Find the payment using the Order Id.- Click Refund.

Uninstall Bleumi Pay

Warning:

- **Incomplete Payment Processing:** If this extension is uninstalled, any order payments that are currently processed by Bleumi Pay will not process any further and result in incomplete payment processing. You may need to use [Bleumi Pay Dashboard](#) to complete processing such order payments.
- **Data Loss:** If this extension is uninstalled, Bleumi Pay data in the [Custom Tables](#) will be permanently lost and cannot be restored even if the extension is reinstalled. Please take a backup of the data before you uninstall the extension.

Steps To Uninstall

1. Log in to the admin panel of your osCommerce installation.
2. Navigate to **Modules > Payment > Bleumi Pay** and click on – **Remove Module**.

3. Download [Bleumi Pay - osCommerce Extension](#).
4. Run the following commands on the unzipped folder.
`$ bash uninstall.sh -d <absolute path of the root folder of your osCommerce installation>`
